

URINE FOR STI PCR PATIENT INSTRUCTIONS

Equipment

- Sterile yellow top container, provided (pictured)

Safety Precautions

- Nil

Instructions

Ensure you do not pass urine during the two hours prior to collection.

1. Wash your hands, and then pass the first part of your urine stream into the sterile container. The jar must be around half full (up to 50ml). Finish passing the remainder of the urine in the toilet.
2. Tightly secure the lid on the collection container.
3. Write your Full Name, Date of Birth and Gender, along with the date and time of collection on the container.
4. Return the specimen with the request slip to the Pathology collection rooms on the day the specimen is collected.
