

## Equipment (pictured)

- Sterile yellow top specimen container, provided.
- Sterile water wipes, provided.
- Single use gloves, provided
- Biohazard bag, provided.

## Safety Precautions

- Do not touch the inside of the container at any time.

## Instructions

- Take yellow top specimen container and sterile water wipes into toilet cubicle.
- Wash your hands and put on single use gloves, if desired.

### FEMALE PATIENTS

- Separate labia with thumb & forefinger. Using other hand clean genital area from front to back using the sterile water wipes provided.
- Dispose of water wipes into rubbish bin.
- Pick up the sterile container

- Commence passing urine into the toilet and without stopping collect the middle stream of urine into the sterile container.
- Finish voiding as normal into the toilet.
- Ensure the top is firmly screwed onto the container.
- Place container into the biohazard bag provided
- Remove and dispose of gloves (if used). Wash hands.
- Ensure the container is labelled with the name and date of birth and UR number or gender along with date and time of collection.
- Return the sample to the nurse.
- If it is not possible to transport the urine to the lab within 2 hours , the urine should be refrigerated.

### MALE PATIENTS

- Clean the head of the penis with the sterile water wipe, retracting the foreskin if necessary
- Dispose of water wipe into the rubbish bin
- Pick up the sterile container
