

Equipment

- Collection containers, provided (pictured)

Safety Precautions

- Nil

Instructions

1. Label each container with your Full Name, Date of Birth and gender, the date and time of collection.
2. Collect one (1) sample of faeces on three (3) consecutive days and place into the containers provided.
3. Keep specimens 1 and 2 in the fridge until the third sample is collected.
4. Bring all three samples into pathology, along with the request form, on the day of collection of the third sample.
